Languages: English (Fluent), Tamil (Native)

Professional Summary

Full-Stack & Senior Frontend Engineer with over 8 years of production experience building high-scale enterprise SaaS products, combining 7 years of deep frontend specialization (JavaScript, Ember.js, modern web architecture) with robust backend systems engineering (Java, MySQL). Proven impact across flagship enterprise solutions including Zoho ERP, Zoho Books, and Zoho Inventory, specializing in client-side state architecture, web performance tuning, REST API design, and database optimization for international enterprise clients.

Technical Skills

- **Frontend Engineering:** JavaScript (ES6+), Ember.js, Component-Driven Architecture, State Management, DOM Optimization, SPA Lifecycle, HTML5, CSS3/SCSS, Responsive Web Apps
- **Backend & System Design:** Java, RESTful APIs, Anti-Abuse & Rate Limiting
- **Databases & Data Management:** MySQL, Query Optimization, Row-Level Locking
- **Tooling, Testing & Practices:** Git, Webpack, Postman, CI/CD, End-to-End Feature Delivery

Professional Experience

Zoho Corporation | Chennai, India

Full-Stack / Backend Engineer

August 2025 – Present

- Build and scale full-stack capabilities across Zoho ERP and the Zoho Finance Suite (Zoho Books, Zoho Inventory), connecting modern web frontends to resilient Java services.
- Designed and implemented automated spam mitigation and fraud detection mechanisms at the onboarding stage, cutting dummy organization creation without introducing UI friction for legitimate users.

- Partnered directly with UI engineers to design clean, contract-first REST endpoints that optimized payload size and reduced client-side rendering latency.

Senior Frontend Engineer

May 2019 – August 2025

- Owned and delivered end-user interface modules for Zoho ERP, Zoho Inventory, and Zoho Books, serving millions of active global businesses.
- Architected large-scale Single Page Applications using Ember.js, establishing reusable design patterns, robust state machines, and clean data-flow architectures.
- Engineered high-frequency transactional UIs including multi-currency payables and bulk item replenishment.
- Bridged product management, accounting compliance, and UX design to transform intricate enterprise workflows into intuitive, performant user interfaces.

Frontend Developer Intern

August 2018 – April 2019

- Implemented modular UI components, cross-browser styling, and client-side form validation mechanisms for finance application workflows.
- Collaborated with senior engineers on bug fixing, accessibility standards, and unit test coverage across key customer-facing flows.

Key Projects & Impact

Self-Serve Onboarding & Anti-Abuse Shield

- **Role:** Full-Stack Engineer
- **Scope:** Seamless user registration combined with real-time heuristic validation to block bot-driven tenant proliferation across the ecosystem.
- **Engineering:** Built client-side pre-validation flows paired with backend rate limiting and behavioral scoring, safeguarding infrastructure resources while keeping sign-up conversion high.

Education

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering (ECE)

Sri Krishna College of Engineering and Technology, Coimbatore
Graduated: 2019
